Discover the modular alternative to conventional millwork.

Change is constant.
Modular Millwork is the ideal system to optimize efficiency of active workrooms. Change, growth, progress... the continual pursuit of improvement poses daily challenges.

To maintain a competitive edge, companies today must constantly innovate, grow and change to keep pace with business objectives and their customers’ needs. More than ever, a modular workroom solution makes good business sense.

Modular Millwork is the only truly modular workroom system. In fact, we created the concept. Modular Millwork is designed to easily adapt to your ever-changing workspace and utilization needs. When change occurs, there's no need to repurchase new millwork or tear out old workroom interiors. Just reconfigure and reuse your existing modular millwork. This saves time, money and the environment by eliminating millwork disposal and preventing unnecessary consumption of virgin raw materials and energy.

Change is necessary (and healthy):
Efficient workspaces are critical to productivity, which demands innovation and change for ongoing success.

Discover the modular alternative to custom millwork.
Real-Life Solution:

"Modular Millwork's flexibility really improved productivity in our 150+ locations nationwide. We no longer have to demolish and replace millwork as our needs change. Instead, we simply reconfigure and redeploy existing modular millwork to update workrooms. That saves us over 75% of the expense we previously incurred to buy new millwork."

– David Kays, United Health Group

We invented "Modular Millwork" to provide a long-lasting millwork solution for active, changing workroom interiors. The "structural" frame design gives you progressive adaptability to reconfigure modules, extending costly millwork obsolescence.

Environmental Stewardship

Modular Millwork is your “cradle-to-grave” green millwork solution. It saves money, enhances workflow—and safeguards our environment:

• Avoids obsolescence and disposal by changing and adapting for ongoing efficiency. Ordinary millwork is replaced, on average, every 2½ years. Modular Millwork has a life span of 10-20 years.
• Prevents unnecessary resource consumption when work changes occur.
• Made of recycled materials.
• Helps preserve the environment. We’ve earned the prestigious “Blue Angel” award for Environmental Certification.
• Prevents harmful and unnecessary landfill content, because it eliminates the “demolition and replacement cycle” of ordinary millwork.
• Designed to improve safety and health. Ergonomically supports employees in their workspace, reducing fatigue while improving comfort, safety and performance.

Modular Millwork is LEED Compliant

Modular Millwork embraces "green" practices, and we work with suppliers and business partners who share our goal to improve and protect our environment.

A few ways we support our environment:

• Use highly recycled and recyclable wood, steel and plastics for products
• Recycling of manufacturing by-products, (packing material, wood waste, plastics, paper, etc.)
• Use recycled materials for product packing and shipping
• Utilize "geothermal" cooling and heating of injection molding facility, eliminating fossil fuel consumption and emissions into the environment

Pre-Planning and Design Services

Using our proven methods, the design team takes the time to understand your needs, objectives and challenges. Our commitment is to improve your business with superior workflow design and truly flexible, modular millwork.

**Fast Finding**
We evaluate your situation to determine your needs and requirements.

**Concept Layout**
Starting with an illustrated design, we create a workspace layout that optimizes space, workflow and efficiency.

**Interactive Design Phase**
We work with you to further refine the layout, based on your workflow requirements and individual workstation needs.

**Written Proposal**
We provide our recommendation in writing, including project scope, specs, and detailed 2-dimensional CAD illustrations.

**Implementation**
We stay involved throughout the entire project to ensure timely delivery and a quality end result.

Real-Life Solution:

“The Modular Millwork team worked hard to understand our vision for the new pharmacy. Based on our objectives, they analyzed our situation and provided workflow design and space planning with detailed, 3-dimensional drawings and space. Their project dedication, design innovations and flexible products helped us achieve excellent ergonomics and efficiency in our new facility.”

– Major John D. Catoe, USAF AETC 56 MDSS/SGSP
Pharmacy Flight Commander - Luke AFB
At Modular Millwork, our philosophy is simple: we don’t ask for your business unless we can improve your business. We go above and beyond what you might expect from a “typical” millwork provider. Our design team will work closely with you to get the best possible perspective on how we can create a solution to meet your specific needs. We’ll provide a written proposal, along with an accurate 3-dimensional CAD illustration of our recommendation in advance — so that you can see how your workroom will look before you spend a cent. No surprises.

Real- Life Solution:
“Modular Millwork’s 3D design-development support eliminated guesswork and enabled us to achieve unprecedented efficiency in our new lab.”
— Jerry Calloway, P.E., CEC Associates Blood Connection, Project Manager

Lifetime Warranty – your satisfaction is guaranteed.
In keeping with our commitment to sustainable, reusable workspace interiors, we guarantee all Modular Millwork products to be free from defect in material and workmanship for the duration of use and ownership by the original retail purchaser. In the event of a defect, product will be repaired or replaced at no charge. Our ongoing goal is to ensure your complete satisfaction with our products and quality-focused workmanship.

Remember: the only constant is change.
Modular Millwork adapts to your ever-evolving workspace needs, delivering greater cost-efficiency and long-term value.
